# Table of Contents

## Keynote Papers

Mining Incomplete Data—A Rough Set Approach .......................... 1  
*Jerzy W. Grzymala-Busse*

Uncertainty and Feature Selection in Rough Set Theory ............... 8  
*Jiye Liang*

Towards Designing Human Centric Systems: A New View at System Modeling With Granular Membership Grades .................. 16  
*Witold Pedrycz*

Sufficiently Near Sets of Neighbourhoods ............................... 17  
*James F. Peters*

## Invited Tutorial

History of Set Theory and Its Extensions in the Context of Soft Computing ................................................................. 25  
*Sarjeroo Nimse and Pawan Lingras*

## Attribute Reduction and Feature Selection

Comparison of Classical Dimensionality Reduction Methods with Novel Approach Based on Formal Concept Analysis .................. 26  
*Eduard Bartl, Hana Rezankova, and Lukas Sobisek*

Rule-Based Estimation of Attribute Relevance .......................... 36  
*Jerzy Błaszczyński, Roman Słowiński, and Robert Susmaga*

Applications of Approximate Reducts to the Feature Selection Problem ................................................................. 45  
*Andrzej Janusz and Sebastian Stawicki*

Dependence and Algebraic Structure of Formal Contexts .................. 51  
*Tong-Jan Li, Ying-Xue Wu, and Xiaoping Yang*

Optimal Sub-Reducts with Test Cost Constraint .......................... 57  
*Fan Min and William Zhu*

An Efficient Fuzzy-Rough Attribute Reduction Approach ............... 63  
*Yuhua Qian, Chao Li, and Jiye Liang*
# Table of Contents

A Novel Attribute Reduction Approach Based on the Object Oriented Concept Lattice ................................................. 71  
Mingwen Shao, Li Guo, and Lan Li

Rough-Set-Inspired Feature Subset Selection, Classifier Construction, and Rule Aggregation ........................................ 81  
Dominik Ślęzak and Sebastian Widz

A Constructive Feature Induction Mechanism Founded on Evolutionary Strategies with Fitness Functions Generated on the Basis of Decision Trees ................................................................. 89  
Mariusz Wrzesień, Wiesław Paja, and Krzysztof Pancerz

An Efficient Fuzzy Rough Approach for Feature Selection ........ 95  
Feifei Xu, Weiguo Pan, Lai Wei, and Haizhou Du

Partitions, Coverings, Reducts and Rule Learning in Rough Set Theory ................................................................. 101  
Yiyu Yao and Rong Fu

A Rough Set Approach to Feature Selection Based on Relative Decision Entropy ......................................................... 110  
Lin Zhou and Feng Jiang

## Generalized Rough Set Models

A Variable Precision Covering Generalized Rough Set Model ........ 120  
Xinwei Zheng and Jian-Hua Dai

Dominance-Based Rough Set Approach on Pairwise Comparison Tables to Decision Involving Multiple Decision Makers .... 126  
Salvatore Greco, Benedetto Matarazzo, and Roman Slowiński

Generalized Parameterized Approximations .......................... 136  
Jerzy W. Grzymala-Busse

Transversal and Function Matroidal Structures of Covering-Based Rough Sets .......................................................... 146  
Shiping Wang, William Zhu, and Fan Min

Some Fuzzy Topologies Induced by Rough Fuzzy Sets .............. 156  
Wei-Zhi Wu, Yu-Fang Yang, and You-Hong Xu

Neighborhood Rough Sets Based Matrix Approach for Calculation of the Approximations ........................................ 166  
Junbo Zhang, Tianrui Li, Yan Yang, and Lei Wang
